Special things in nature like light, water, creation stories.	Special symbols and objects in the local community. Special ways of living, including the life of Jesus
-----------	--	---	---

Teaching programmes for **English** and **Maths** are based on the New National Curriculum for Literacy and Numeracy. Teaching is skills based and is adjusted to match the ability needs in each class, and all elements build on what children can do. Reading skills are taught through the Letters and Sounds programme and children are able to use their good phonic skills in writing too. This builds on the previous year. The Internet is used both in Computing lessons, where the skills needed are taught, but it is also used in other subjects as appropriate.

We also try to respond to the interests of the children, and may sometimes substitute a more appropriate topic as long as it delivers the same learning objective.
