

Find one fewer

A subtraction game

What you will need...

- Numicon 0-5 and 5-10 dice
- 10 Counters for each player

What to do...

- Players take turns to choose a dice and roll it.
- Find the pattern on the board that would be 'one fewer' and cover it with a counter.
- Continue until all the counters are used. Discuss which Numicon pattern has the most counters and which has the fewest.
