

Find how many fish, without counting

A grouping activity

What you will need...

- Counters
- Numicon Shapes 1-10
- Number Line

What to do...

- Ask your child to look at the picture and guess how many fish there are, then put a counter on each fish.
- Take the counters off the fish one by one and build them into Numicon Patterns (make the 10-pattern first and then the rest).
- Match Numicon Shape on top of the counters to check and say aloud how many fish there are.
- Find the number on the Number Line.
